

PROFILE

Designer working where product design meets AI systems — trained on objects, moved through interfaces, now building the systems underneath them. Currently completing an MS in Strategic Design & Management at Parsons, where my graduate work ships as working software: four projects with live, interactive demos, designed and built end to end — Next.js, TypeScript, and AI-assisted development.

SELECTED WORK — LIVE AT RISHABHSALIAN.COM

- Follow** Capstone · Spring 2026 · working demo
A shared, trackable memory layer between a team's AI tools — one index of what the team knows, and a directory of who knows it. Ships with a live sandbox: a real model running Follow's MCP tools on the wire.
- Greener Hours** Course project · Spring 2026 · working demo
An open carbon-disclosure standard for AI compute — one indicator, three surfaces (chat, scheduler, org dashboard), running on a shared live simulation.
- Healthy Materials** Graduate research · Fall 2025 · working demo
Healthier-material spec packages priced to survive value engineering — field research with the Healthy Materials Lab, made tangible as a working spec configurator.
- Housing Works** Studio project · Spring 2025 · working demo
Trustee-taught micro-workshops that keep learning in-house — service design fieldwork turned into a working matcher, session, and archive tool.

EXPERIENCE

- 2024–26

Parsons School of Design · The New School, NYC
MS, Strategic Design & Management — client work, graduate research, and Follow: designed and shipped end to end — Next.js, TypeScript, and AI-assisted development.
- 2023–24

Freelance · Product, UX & graphic design
Research, personas, flows, wireframes, and UI for websites and apps — working with clients and developers through to launch.
- 2022–23

Mindseye Creative · UX Designer
Led UX research and design for websites and apps — guiding UI designers and staying with each project through development and launch.
- 2021–22

YAAP Digital · Junior Art Director
Social and brand creative for a range of businesses — and the agency's own Instagram presence.
- 2020

Think Design · Design Research Intern
User interviews, synthesis, and a findings report.
- 2019

YAAP Digital · Design Intern
Concept and creative support across design projects.

WHAT I WORK WITH

- Design**
Product & UX design · design research & synthesis · systems & strategic design · interaction & visual design · Figma · Photoshop & Illustrator · 3D modeling
- AI & build**
End-to-end apps with Claude & Claude Code · MCP (servers + tools) · Anthropic API & agentic architectures · prompt & agent design · Next.js · React / React Native · TypeScript · Python / FastAPI · Git & GitHub · Railway
- Ways of working**
Systems thinking · clear writing · cross-functional collaboration · shipping under constraint

EDUCATION

- Parsons School of Design**
MS, Strategic Design & Management
The New School · expected 2026
- ISDI, Mumbai**
4-year Diploma, Product Design
2021
- University of Mumbai**
BA, Sociology
2021
- Vibgyor High**
CIE A Levels
2016

OPEN TO

Design Engineer and Product roles at AI-native teams — Brooklyn / NYC.
